CE UL TÜV PG **Patented**

A Model of Efficiency

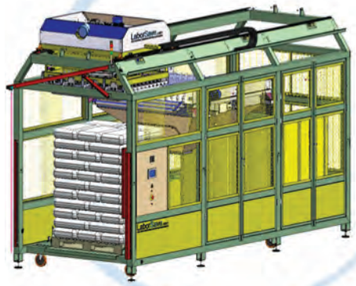
The patented LaborSave™ is a fully automatic, highly effective sack emptying system that provides unprecedented performance and unrivaled results. The cost-efficient LaborSave™ has three models to meet a range of needs.

HC Model

600 sacks/hour
99.90% empty

G2 Model

800 sacks/hour
99.99% empty



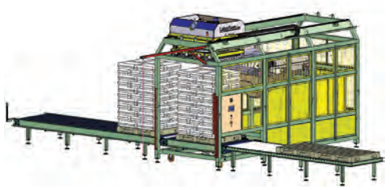
VHC Model

1300 sacks/hour
99.99% empty

Optional Supplementary Equipment

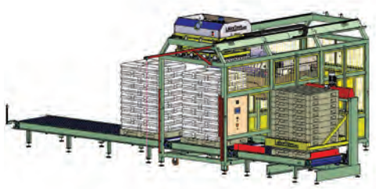
The optional peripheral equipment complements the basic system for all LaborSave™ models.

Pallet Feeding Conveyor



Pallet Removal Conveyor

Automatic Pallet Stacker



LaborSave™

A Stack of Advantages

Significant savings from increased efficiency, less waste of raw material and less labor. And here are more reasons why LaborSave™ makes sense.

Greater throughput	Up to 1300 sacks per hour
Increased efficiency of raw materials	More than 99.99% empty
Reduced labor	Automatic sack unloading and emptying
Enhanced safety	Total elimination of manual lifting
Reduced contamination risk	A clean sack emptying environment
Enhanced flexibility	Suitable for standard sack types
Quick ROI	**Tremendous savings in raw materials, labor, storage and transportation**

LaborSave™. A classic case of brilliant simplicity.

"Your machine is a 'jewel.' I stop by once a day just to admire its efficiency."
Head of logistics, Ginegar Plastic Products Ltd.
