THOMAS CONVEYOR: THE LEADER IN QUALITY, EXPERIENCE, AND INNOVATION.

When you choose a conveyor manufacturer for your wastewater treatment plant, why not choose the best?

Thomas Conveyor Company.

Since our beginning in 1953, Thomas Conveyor has provided a wide variety of wastewater treatment equipment to numerous facilities worldwide.

Through the years, we've developed a lasting reputation, for innovation, exceptional quality, and leadership. And we've proven that Thomas is a company you can rely on, from design to delivery. Here's

The Thomas Conventional Screw Conveyor is ideal for use in wastewater treatment plants for many reasons, including its compact size, cost efficiency and low maintenance.

why Thomas Conveyor should be the number one choice for your wastewater treatment application.

EXPERIENCE AND STABILITY.

Thomas Conveyor has provided equipment for literally hundreds of wastewater treatment plants in the United States and Canada. Today, we're a strong, multi-million dollar company serving our customers with a 230,000-square-foot facility dedicated to the manufacture of conveying equipment.

TECHNOLOGICAL LEADERSHIP.

Thomas Conveyor's reputation for engineering and technological expertise is well-deserved. Many of our innovations are now industry standards. Robotic welding.

Thomas Conveyor's custom-designed, heavy-duty Hoppers, Bins, and Multi-Screw Live Bottom Feeders (shown during assembly) work with conveyors for sludge collection, storage, and track-loading applications.

Close tolerance lathes. Robotic hard surfacing. The first shaftless screw conveyor made in North America. And more.

Every day, the professionals at Thomas Conveyor are searching for better solutions to today's — and tomorrow's wastewater treatment problems.

UNMATCHED CUSTOM DESIGN CAPABILITIES.

No other company comes close to Thomas Conveyor's in-house engineering and design capabilities. Thomas Conveyor can deliver equipment custom-designed to your plant's individual specifications. In fact, a full 99 percent of our products are

The Thomas Shaftless Screw Conveyor, the first of its kind made in North America, is an excellent solution for semi-fluid or sticky materials which are difficult for conventional screw conveyors to handle.

manufactured in-house. Our professional engineering staff is always ready to help. And our large Computer Aided Design department uses the latest technology to find effective solutions for your wastewater treatment plant. Thomas Conveyor also designs and manufactures custom electrical panels specifically for your application.

This kind of expertise has made Thomas the largest custom screw conveyor manufacturer in North America.

SUPERIOR PRODUCTS.

Thomas Conveyor uses quality tools, machinery, and materials to produce a complete line of

Built for lasting use, the Thomas Continuous Mixer easily mixes and conveys sewage sludge for pH stabilization and composting applications.

products for wastewater treatment applications. Very often, our products exceed the standards set by the industry. Thomas Conveyor's rolling process results in smoother troughs, which means less material build-up. And our high-tech, robotic welding equipment delivers accuracy and reliability.

SKILLED PERSONNEL.

When you hire Thomas Conveyor, you're hiring the combined skills of more than 250 dedicated professionals who are committed to your success. In every department of Thomas Conveyor — from the management team to the engineering staff to the machine operators — you'll find outstanding personnel with the skill and dedication it takes to get the job done.

The finest machine of its type on the market today, the Thomas Grit Washer is used to separate, classify, and dewater grit from wastewater and grit slurries.

TIME & COST SAVINGS.

Our unique approach to inventory, fabrication, welding, and assembly gives us an edge on the competition. Each order is completed and shipped according to your requirements and your schedule. Plus, Thomas Conveyor's prices are competitive with any company in the industry.
